

Because of the large diameter of the piston these drills are equally efficient with low air pressure. It comes with robust ratchet wheel rotation mechanism, short stroke and good penetration rates in soft and medium hard rock. The WR version with clockwise rotation can be used for butts tightening when roof bolting. The drills are suitable for production drilling, raise driving and bolting.

What is good about it?

- Low Air Pressure
- Short Stroke
- Good Penetration Rates

Where it is used?

- Under Ground Mining
- Soft and Hard Rock Penetration
- Buts Tightening
- Roof Bolting
- Production Drilling

Specification

Model #	RMT 46 WS-6	
Weight	39 kg	86 lb
Length retracted	1435 mm	56½"
Length extracted	2205 mm	86.8"
Air pressure	6 bar	87 psi
Air consumption	90 l/s	191 cfm
Blows per minute	3000	
Piston dia	75 mm	3"
Piston stroke	45 mm	1¾"
Shank size (Hex) - 8311 0202 03	22 x 108 mm	7⁄8" x 4¼"
